- Working as the library director at IZTECH for 19 years.
- Bachelor's Degree from Hacettepe University, Library Science Program, and a Master's Degree from Kocaeli University, Business Administration.
- I participated in OpenAIREPlus, OpenAIRE2020, and OpenAIRE Advance projects. Working as an OpenAIRE Turkey NOAD since 2011
- Executive board member of OpenAIRE AMKE. (2021-)
- Project partner of PATTERN and DIRNA (EU Projects).
- A founder partner of Research Ecosystems, an R&D Company established within IZTECH Technopark in 2021.

Higher Education Landscape in Türkiye

The screenshot shows the YÖK website interface. At the top, there are logos for YÖK and the 100th anniversary of the Republic of Turkey. Below the logos is a navigation menu with options like Anasayfa, Kurumsal, Üniversiteler, Projeler, Yayınlar, İstatistikler, Akademik, Öğrenci, and İletişim. The main content area displays a list of universities under the heading 'Üniversiteler / Üniversitelerimiz'. The list includes Abdullah Gül Üniversitesi, Acıbadem Mehmet Ali Aydınlar Üniversitesi, Adana Alparslan Türkeş Bilim ve Teknoloji Üniversitesi, and Adıyaman Üniversitesi. There is a search bar and a dropdown menu for 'ŞEHİR SEÇİNİZ...'. A red button labeled 'Tüm Üniversite Listesi' and a blue button labeled 'Tüm Üniversite Listesini Yazdır' are also visible. Below the list is a map of Turkey with several regions highlighted in red, indicating the locations of the listed universities.

Özet: Akademik camiada ortak çıkarların yaratılması amacıyla bilginin paylaşılmasına armağan edilmiş toplumsal bir hareket olan Açık Erişim, bugün dünyada pek çok bilim insanı, yayınevi ve araştırmacı tarafından desteklenmektedir. Açık erişimin temelini oluşturan kurumsal arşiv sistemleri için kullanılan yazılımlar, ücretsiz olan açık kaynak kodlu yazılımlar ve çeşitli firmalar tarafından geliştirilen ücretli paket programlardan oluşmaktadır. İlk sürümü 2002 yılında kullanıma sunulan DSpace Massachusetts Teknoloji Enstitüsü (MIT) ve Hewlett Packard (HP) işbirliğiyle geliştirilmiş açık kaynak kodlu kurumsal arşiv yazılımıdır ve Kasım 2012 itibarıyla dünyada 1.360'tan fazla kurum tarafından kullanılmaktadır. Bu çalışmada, açık erişim ve kurumsal arşivler üzerinde durularak, DSpace kurumsal arşiv yazılımının özellikleri ve açık erişim girişimlerine olan katkısı vurgulanmaya çalışılmıştır.

Immediate invitation
by COHE to brief them
about open science
principles

CoHE established an
official Open Science
Committee

Two meetings were held with
President of CoHE in October
and December 2018

CoHE established Research
Data and Open Data Task
Force Sub-Working Group

Türkiye's Roadmap for Universities

5b: Open access to publications and data in an open science context

Open Access and Open Science constitute basis for increased visibility, increased citations, equal access (including disabled people), wider dissemination of scientific knowledge and research results. The impact of open access is favourable in terms of capturing value out of research and achieving increased returns to public investment in research.

Council of Higher Education (YÖK) together with TÜBİTAK are leading the processes for enabling open access at national scale. The national level strategies and actions would be complemented by university level activities for open access.

Objective 5b: Promoting and implementing an Open Science and Open Access approach

YÖK formed a Commission on Open Access including the rectors, related faculty members, TÜBİTAK representatives and library documentation experts. In this context, YÖK highlighted the importance of establishment of the "Open Academic Archive System" in the international standards in all universities, the integration of the university archives into "Open Access" (OpenAIRE)" through Harman (national installation of OpenAIRE software), and using of "Universal Researcher Numbers (ORCID)".

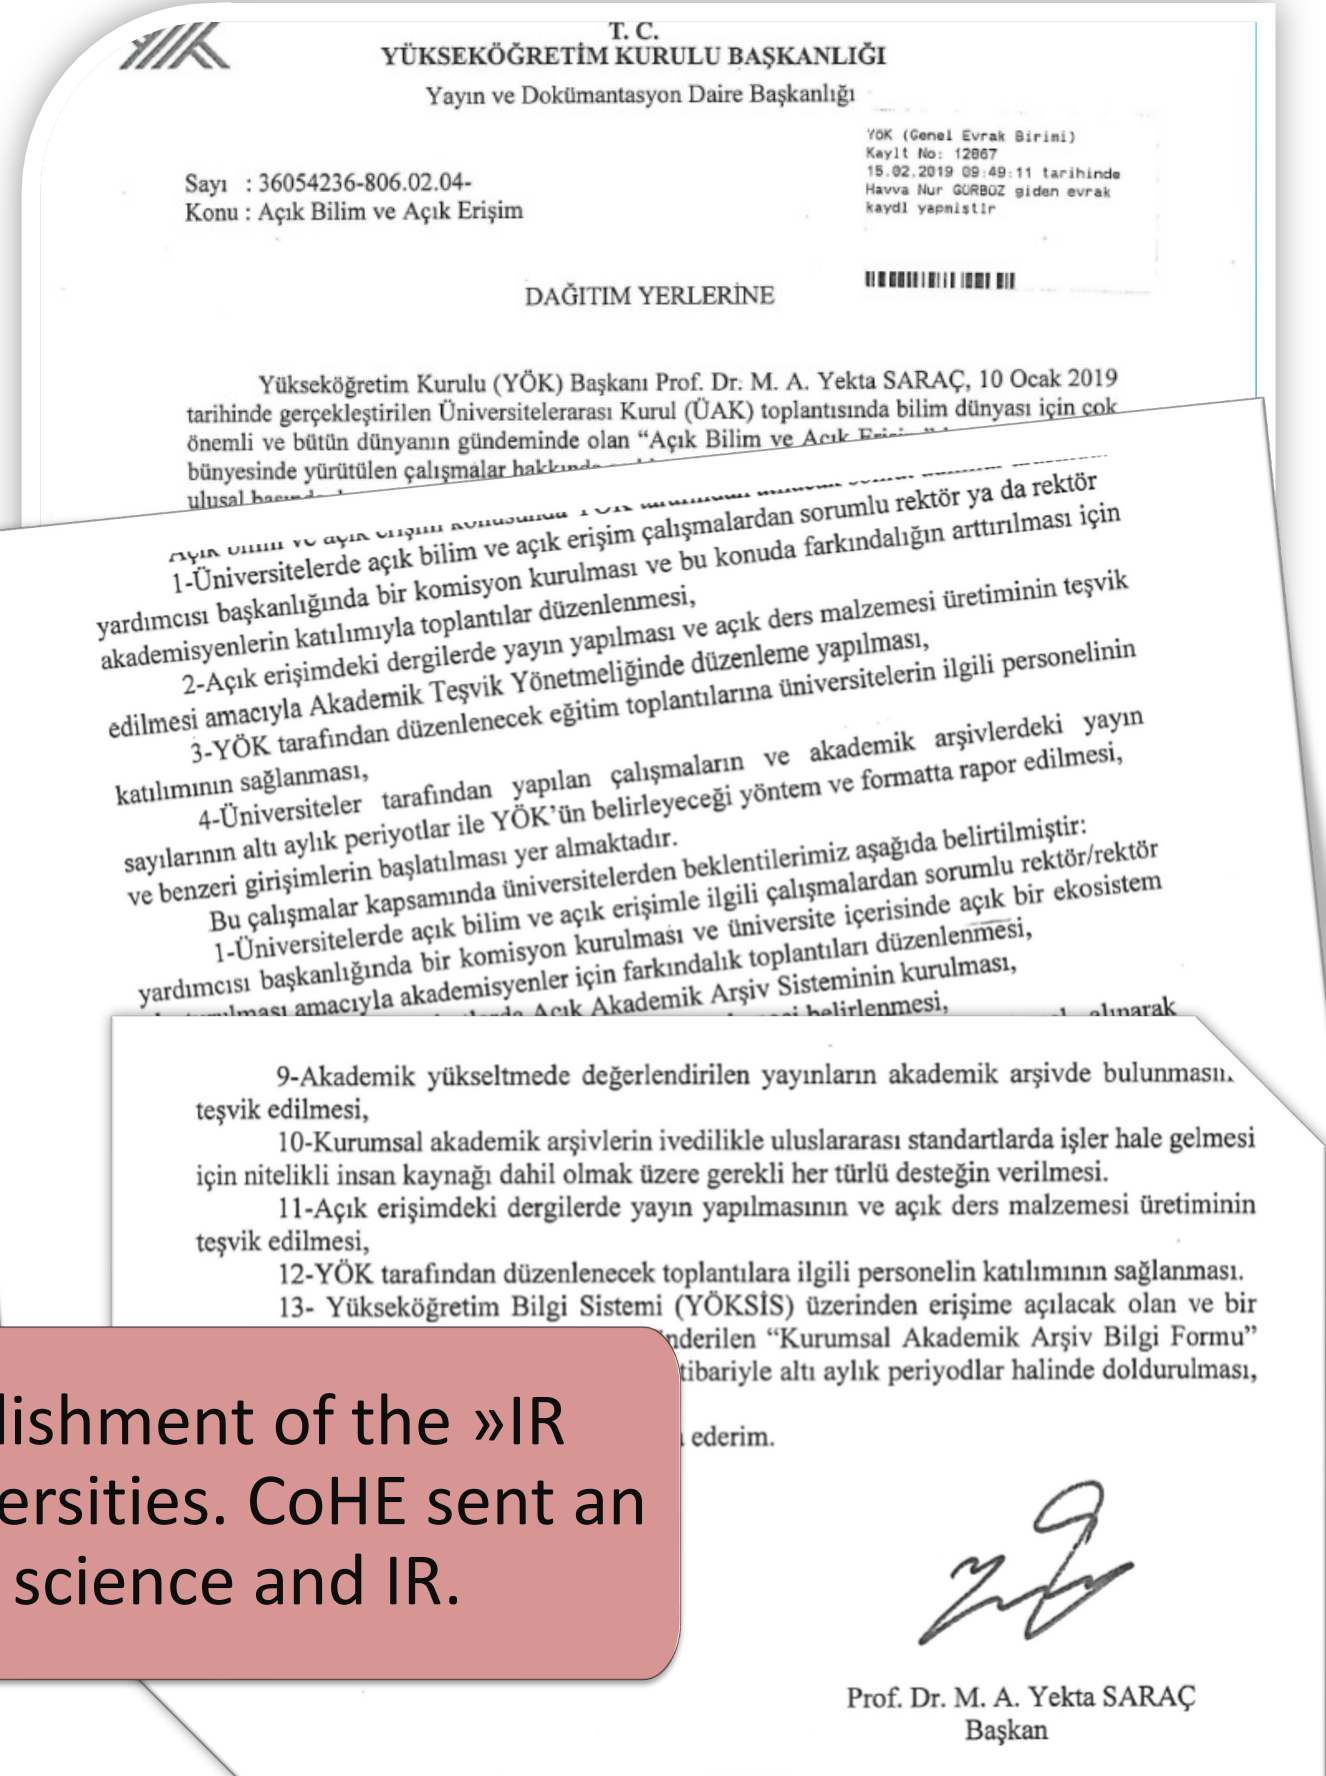

Concrete steps are declared by YÖK as of January 2019:

- Reporting of the work carried out by universities and the number of publications in open academic archives in a method and format determined by YÖK in six-month periods,
- Establishing a commission under the chairmanship of the rector / vice-rector responsible for open access and open science studies at universities and organizing awareness meetings to develop a clear ecosystem within the university,
- Revision of the Academic Incentive Regulation in order to promote publishing in open access journals and production of open education material,
- Ensuring the participation of the relevant staff of the universities in the meetings and trainings organized by YÖK.

In 2019, TÜBİTAK will take decisive cooperation with YÖK:

- Adoption of TÜBİTAK's Open Science
- Adoption of the timeline: 2019-2020 as the year of transition for all support programmes
- Launching pilot call with Open Science requirements in the second half of 2019
- Setting up of the aperta.ulakbim.gov.tr (Institutional Repository for TUBITAK and Research Data Management to serve all universities) as a live system (live)

CoHE highlighted the importance of the establishment of the »IR System" in the international standards in all universities. CoHE sent an official letter to all universities about open science and IR.

TUBITAK Open Archive: APERTA

The screenshot shows the Aperta website interface. At the top, there is a search bar with the text 'Arama' and a magnifying glass icon. To the right of the search bar are navigation links: 'Yükle', 'Topluluklar', 'Hakkında', 'Yardım', 'Giriş', and 'Yeni Kayıt'. Below the search bar, the main content area displays a list of search results. The first result is for a paper titled 'OPTIMAL OVERCURRENT RELAY COORDINATION IN DISTRIBUTION NETWORKS USING PATH FINDER ALGORITHM' by Mert Bekir Atsever and Mehmet Hakan Hocaoglu. The paper is dated 2024 (v1) and is marked as 'Konferans bildirisi' and 'Açık Erişim'. A red box highlights the URL 'https://aperta.ulakbim.gov.tr/'. Below the paper title, there is a 'Görüntüle' button. To the right of the search results, there is a sidebar with the heading 'Aperta Nedir?' and 'Aperta'nın Kapsamı Nedir?'. The sidebar text describes Aperta as a TÜBİTAK ULAKBİM managed open access repository for multidisciplinary research data. A red box highlights the text 'Institutional Repository for TÜBİTAK & Research Data Repository to serve all universities'. Below this, a yellow box highlights the text 'Provide open access to scientific publications and research data by adopting the "TUBITAK Open Science Policy."'.

The screenshot shows a detailed view of a record on the Aperta website. The record is for a database titled 'Database Covering the Previously Excluded Daily Life Activities'. The record is dated 2023 and is marked as 'Veri seti' and 'Açık Erişim'. The authors listed are Şenay Mihçin; Ahmet Mert Sahin; Mehmet Yilmaz; Serap Sahin; Sevinc Akdeniz; Aliye Tosun. A red box highlights the text 'Data Set Record from IZTECH'. Below the title, there is a summary of the database, which states: 'In biomedical engineering, implants are designed according to the boundary conditions of gait data and tested against. However, due to diversity in cultural backgrounds, religious rituals might cause different ranges of motion and different loading patterns. Especially in the Eastern part of the world, diverse Activities of Daily Living (ADL) consist of salat, yoga rituals, and different style sitting postures. Although databases cover ADL for the Western population, a database covering these diverse activities of the Eastern world, specific to these populations is non-existent. To include previously excluded ADL is a key step in understanding the kinematics and kinetics of these activities. By means of developments in motion capture technologies, excluded ADL data are captured to obtain the coordinate values to calculate the range of motion and the joint reaction forces. This study focuses on data collection protocol and the creation of an online database of previously excluded ADL activities, targeting 200 healthy subjects via Qualisys and IMU motion capture systems, and force plates, from West and Middle East Asian populations. Anthropometrics are known to affect kinematics and kinetics which are also included in the collected data. The current version of the database covers 50 volunteers for 12 different activities, the database aims for 100- male and 100- female healthy volunteers as the final target including C3D and BVH file types. The tasks are defined and listed in a table to create a database to make a query based on age, gender, BMI, type of activity and motion capture system. The data is collected only from a healthy population to understand healthy motion patterns during these previously excluded ADLs. The collected data is to be used for designing implants to allow these sorts of activities to be performed without compromising the quality of life of patients performing these activities in the future.' Below the summary, there is a table of files available for download. The table has two columns: 'Önizleme' and 'Daha Fazla'. The files listed are:

Önizleme	Daha Fazla
bvh_database.zip

TUBITAK Open Science Policy

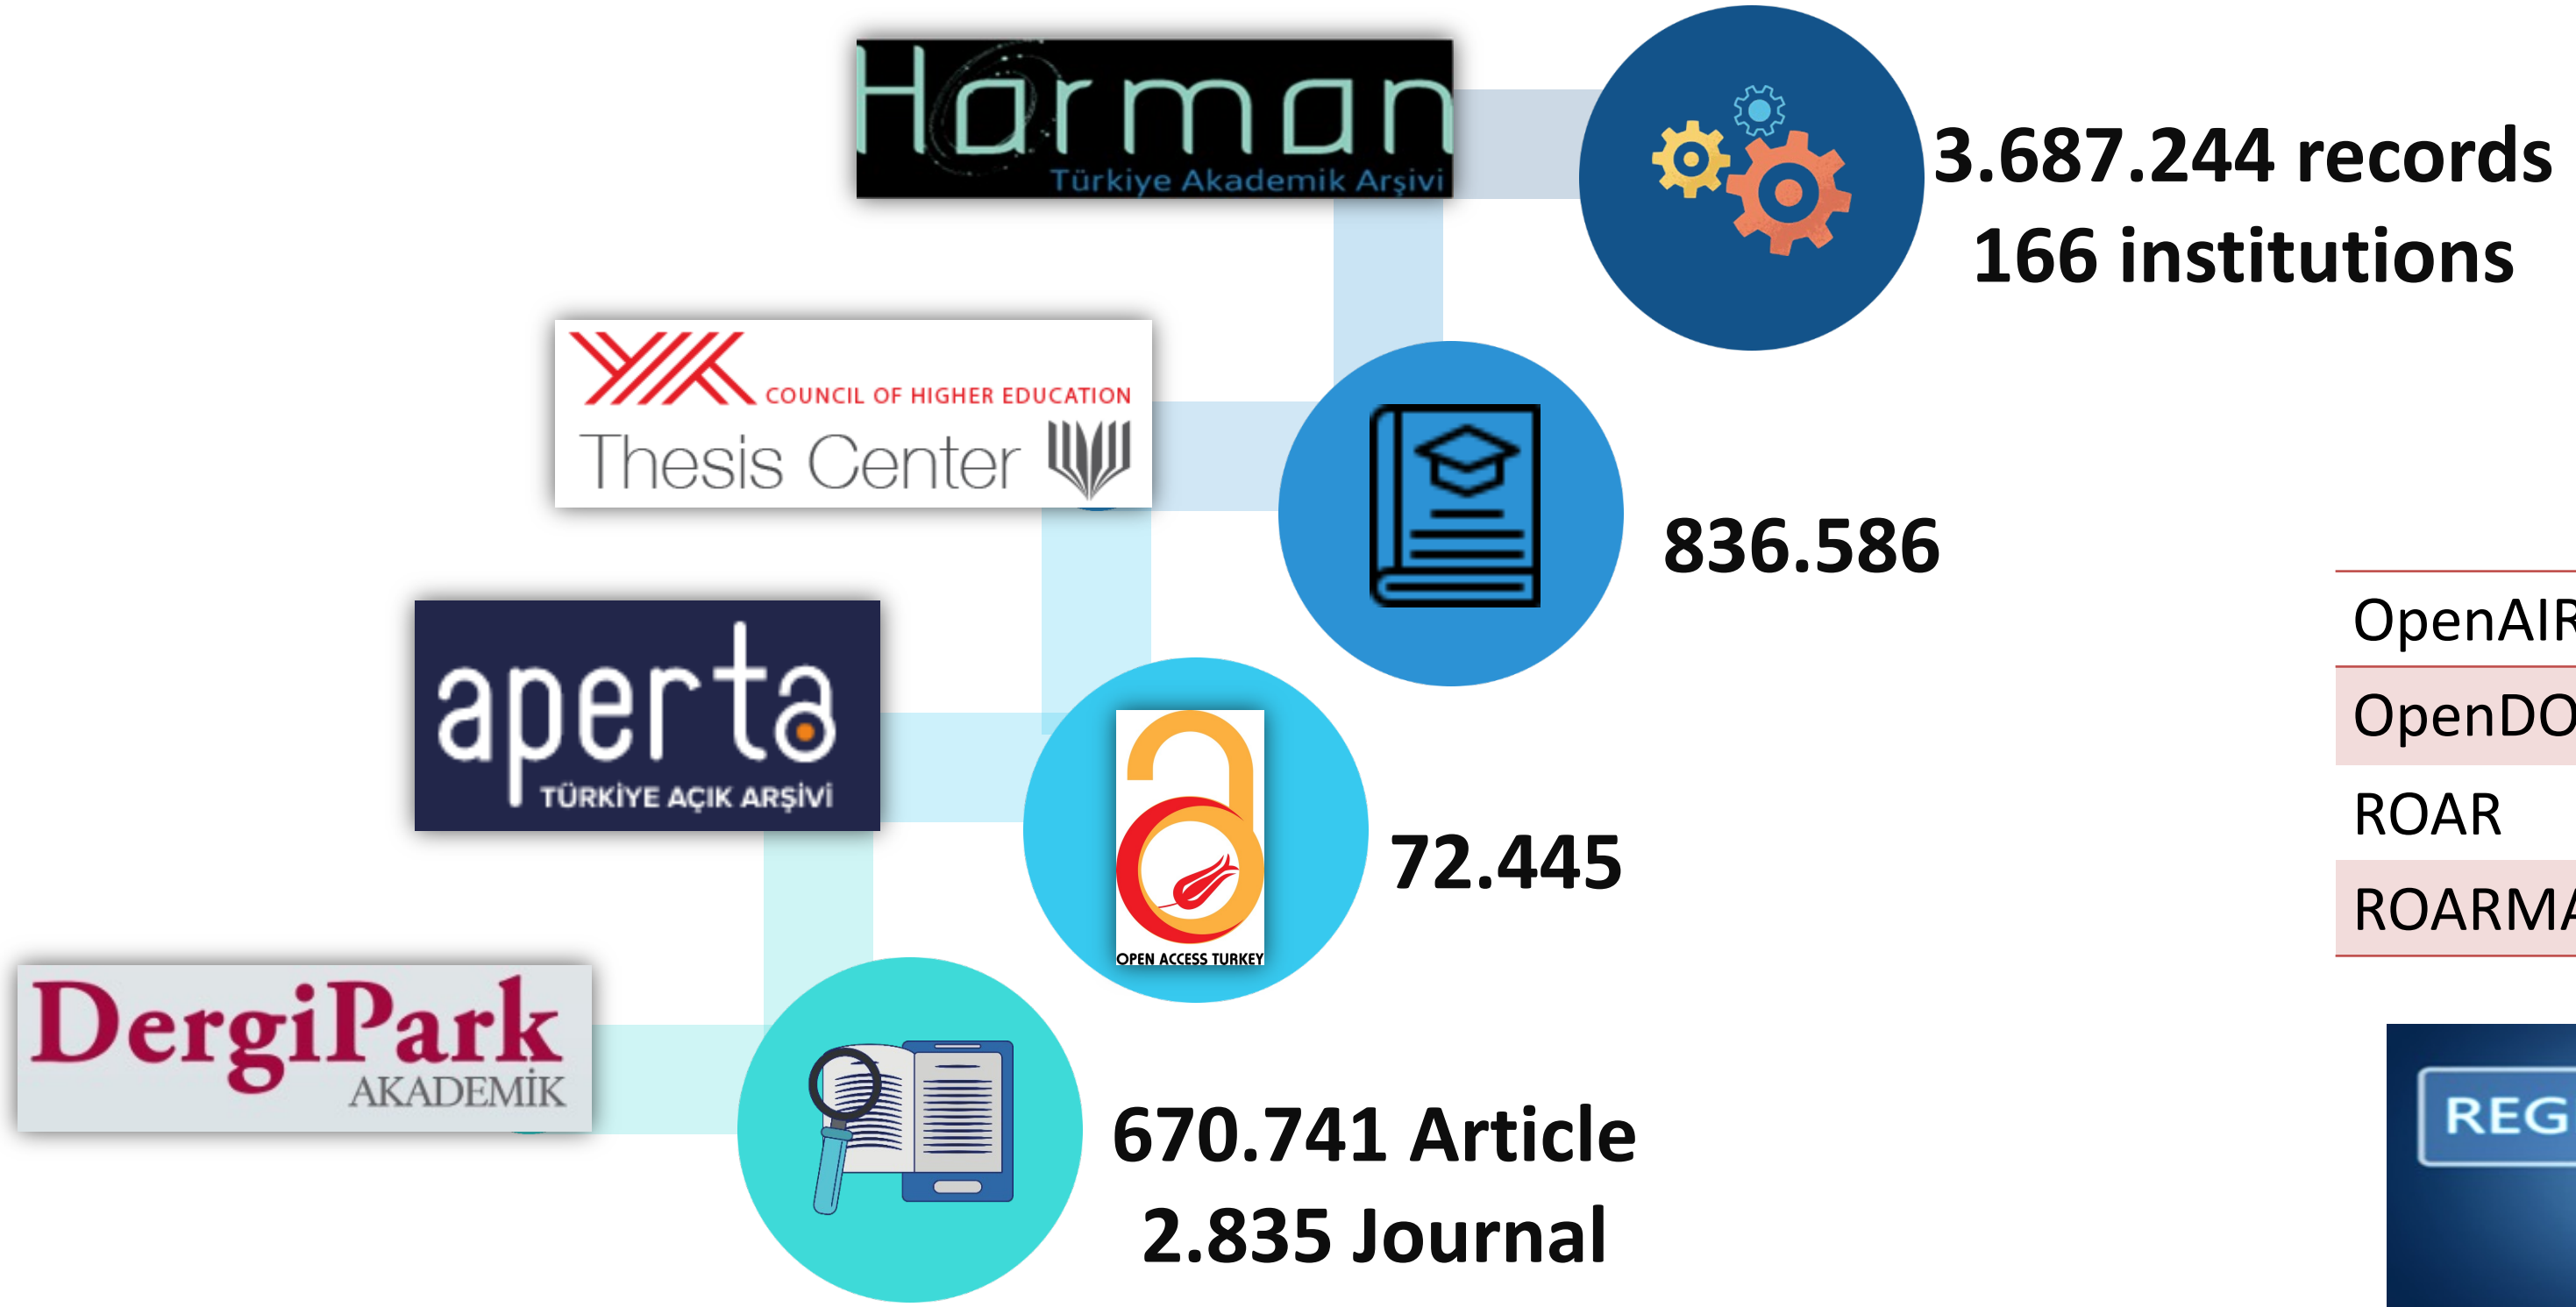

Policy Title:

The management, storage, archiving, compilation and digital protection of the publications and research data originated from the projects which have been carried out or supported by The Scientific and Technological Research Council of Turkey (TUBITAK) constitute the framework of TUBITAK's Open Science Policy.

Purpose:

The concept of Open Access was first introduced in 2002 as "free availability of scientific literature on the public internet, permitting any users to read, download, copy, distribute, print, search, or link to the full texts of these articles, index them, pass them as data to software, or use them for any other lawful purpose, without financial, legal, or technical barriers other than

IZTECH: Pioneer of Open Science in Türkiye

Open Science Movement in IZTECH Milestones

IZTECH Open Access and Open Science Policies

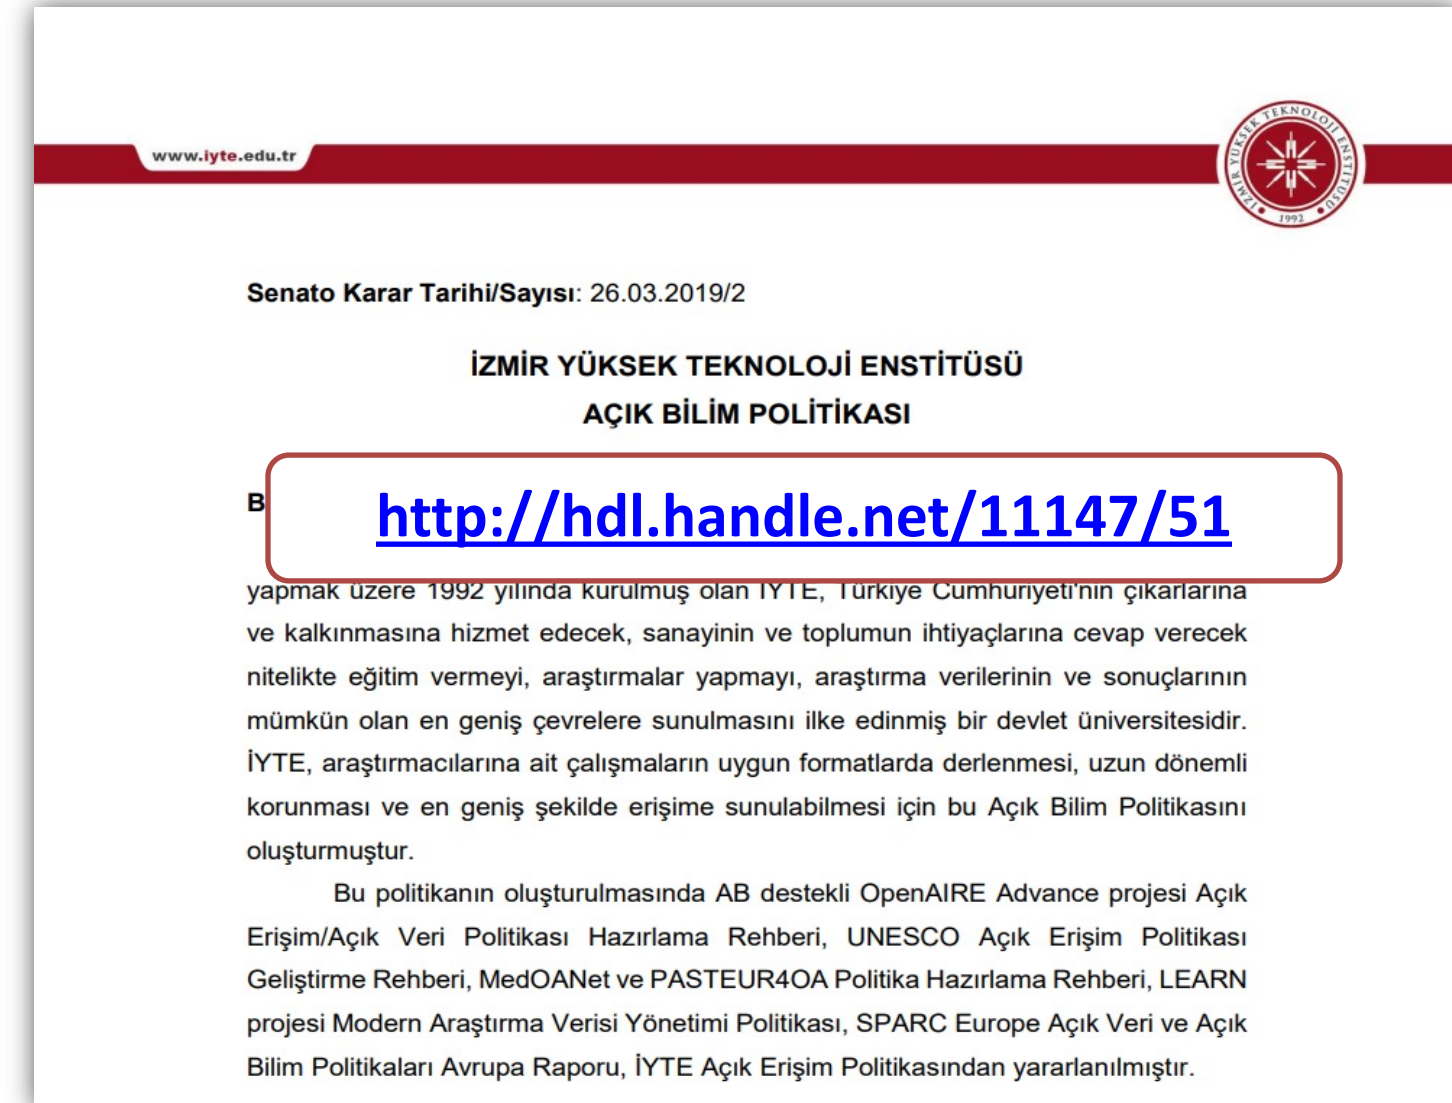

IZTECH Open Access Policy was approved by IZTECH Senate on 08 October 2013.

IZTECH Policy was the first Open Access Policy in Turkey.

It was sent to other Turkish universities as a model policy by CoHE.

2013

- Translated OpenAIRE model Policy on Open Science for Research Performing Organisations (RPOs) into Turkish and adapted it to Izmir Institute of Technology (IZTECH) as a model.
- IZTECH Open Science Policy was approved by IZTECH Senate on 26 March 2019.
- This policy, the first Open Science Policy in Turkey, includes details on both publications and research data.
- It was sent to other Turkish universities as a model policy by CoHE.

2019

PATTERN.

Empowering Higher Education Institutions by trainings for researchers on Open and RRI practices

Claudia Iasillo¹, Alessio Livio Spera², Cristina Ribeiro Do Canto Lagido³, Asya Sainikova⁴
¹APRE, Italy; ²Aarhus University, Denmark; ³ESF, France; ⁴iasillo@apre.it

IN A NUTSHELL

PATTERN aims at promoting the practice of Open and Responsible Research and Innovation by developing and piloting training activities for researchers at all stages of their careers.

8 transferable skills on Open Responsible Research and Innovation	14 Higher Education Institutions testing PATTERN training
8 training modules	1 innovative PATTERN platform
+100 training activities	

TARGETS

 Researchers <i>Who will benefit from the trainings</i>	 Higher Education Institutions <i>Who will deliver the trainings Who is responsible for researchers' trainings</i>
 Civil society <i>Who will interact with researchers trained through PATTERN</i>	 Policymakers <i>Who will influence the trainings organization in HEIs</i>

IYTE GCRIS Database

GCRIS Database is a research and performance evaluation information system that enables searching and discovering all research outputs within the Izmir Institute of Technology research ecosystem, associating these outputs with researchers, providing advanced reporting with different metrics, and supporting corporate strategic decisions. Besides, it is an institutional repository at international standards that brings together and organizes all kinds of academic outputs related to research activities and allows sharing with the whole scientific world by providing long-term preservation.

OpenAIRE

Open Scholarly Communication
Infrastructure

Becoming a Member

Services for all
actors in the R&I
ecosystem
<http://catalogue.openaire.eu>

Why become a member of OpenAIRE

- Because you are an **Open Science leader**, or you want to become one
- Because you want to **co-shape how Open Science** is implemented
- Because you want **innovation** and **state-of-the-art technology** in scholarly communication
- Because you want your **investments to have a transformative impact**
- Because you want to build the **new generation of skilled professionals**

Because you understand that Open Science isn't just the future—it's the present.

What you get out of OpenAIRE

- **Gain access to an extensive network of organisations** all actively engaged in Open Science. A platform for shared learning and exchanging insights, strategies, and best practices.
- **Get the unique opportunity to co-create and co-own OpenAIRE standards and services** and collaborate with fellow Members to shape these according to your specific needs.
- **Deploy OpenAIRE services locally, integrate with infrastructures** such as EOSC and benefit from substantial discounts, privileged access, and prioritized support.

What you get out of OpenAIRE

- **Drive the national Open Science agenda forward** by positioning your institution as an active and visible Member of the national and global Open Science community. Participate in existing initiatives or spearhead new activities.
- **Develop leadership skills in Open Scholarly Communication** through participation in EU proposals, contributing to the development of Open Science policies and frameworks.
- **Use global OpenAIRE channels** to promote national services, positions, and events, reaching a wider audience.

How you participate

- **Standing Committees**

- Open Science Policies
- Training & Support
- Outreach & Engagement
- Services & Technology

- **Working Groups**

- Research Data Management
- Open Science Monitoring
- Business Models
- Interoperability Guidelines
- EOSC

Fees for members

| Fees for members

The following fee tiered structure for members is effective from 2024.

- NOADs, Research Performing and Research Funding Organisations' fees are differentiated based on the **Gross Domestic expenditure on Research and Development (Eurostat GERD) (TIER 1-3)**.
- Non-profit organisations and ERICs will pay an annual fee of **1000 Euros (TIER 4)**.

TIER	THRESHOLD GERD	FEE IN EUROS
Tier 1	2.5 - 5.0	2500
Tier 2	1.0 - 2.5	1500
Tier 3	0.0 - 1.0	500
Tier 4	Flat	1000

Discounts are foreseen in the following cases:

- **Group membership** from National Consortia: 10% for 2-3 members, 20% 4-6 members, 30% for 7+ members.
- Organisations that come from countries with austerity, war or similar extraordinary conditions will pay 0 fees. Criteria to be decided by the EB*.

Interested in membership? Contact us or our **NOADs**

- Our network of **37 European National Open Access Desks** are experts in Open Access and Open Science.
- They are **embedded in national infrastructures** and are here to help you make the transition to Open Science: starting from the basics **on OA policies and mandates**, on to how to apply good **Research Data Management**, to address **legal aspects**, or to **build and use infrastructure**.
