

Enhancing FAIR Research Data Management Competence: Activities at National Science Centre Poland (NCN)

Wednesday, 10 April 2024 16:20 (20 minutes)

Effective research data management is important for an impactful and transparent research process. This presentation will focus on various initiatives undertaken by the National Science Centre (NCN) to strengthen research data management practices. As one of the key institutions supporting scientific research in Poland through the funding of research projects, NCN places great emphasis on fostering the development and enhancing research data management skills. The presentation will outline NCN's activities aimed at raising awareness and promoting the FAIR research data management practices. It will also highlight the training opportunities provided to researchers and Data Stewards, to support them in effective collecting, storing, sharing and archiving research data.

Presenter: CZARNY, Gabriela (National Science Centre - NCN)

Session Classification: Session III
